

J. Bloom, Owner: The Sauna Bar; London UK

The following was submitted to World Living Water Systems by J. Bloom, the owner of The Sauna Bar in London after purchasing and installing the Vortex Water Revitalizer in his business:

“We have had the Vortex Water Revitalizer installed into our main water supply at our spa, The Sauna Bar, Convent Garden, London and have been very impressed with the results. Our water has become amazingly soft without the use of chemicals. We have noticed a massive reduction to the lime scale everywhere. There is no more lime scale in our pipes. The taps, the mirrors and showers stay much cleaner and the glass windows remain crystal clear. There is less maintenance in our Jacuzzi, and the smell of chlorine is much milder. The jets in the Jacuzzi also flow with much more ease and force. Our staff and clients drink our ‘Revitalized Water’ straight out of the taps. We get feedback that the water tastes clean, fresh, and smooth. We have a fish tank and have noticed that the fish are livelier and tank stays cleaner for a longer period of time.

Overall, while still maintaining high standards, we have noticed a considerable savings on expenses and labour, due to the changes in the water. We wish to inform you that we are very happy with the results. We would recommend your product to any spas. We like the fact that the system can benefit many areas of our business. Since then, we have now also installed the Vortex Water Revitalizer into my home and other businesses: a new retreat in Northampton, Flore Retreat, and soon to be in our nightclub in Earl’s Court, Miss Q’s.”
